PROJECTS

Bet Your Sports
A fantasy sports app that allows users to gamble bogus money based on actual games and spreads. The app utilizes Fantasy Datas API to generate details from a random 2008-2015 NFL game. This program was written with JavaScript, JQuery and custom CSS. Bet Your Sports provides an exciting gaming experience for users.

Pokemon Node
This app allows users to keep track of their favorite Pokemon and send them to the gym for battle. Pokemon Node is a CRUD app that allows users to create, retrieve update and delete elements. This program was written with JavaScript front end, custom CSS, Bootstrap, two databases, PSQL and an Express back end.

Mean Ski
Mean Ski is an e-commerce storefront that allows users to view items and add them to a shopping cart. This project utilizes AngularJS as a front end framework and demonstrates the power of two way data binding. Other technologies used include Bootstrap, JavaScript, and custom CSS.

FRM
FRM is a CRM for personal relationships. Users can create new connections and set notification preferences to help keep them on top of their family, friends and partners. FRM is a decoupled app that utilizes React.js front end and an Express back end. We incorporated local Oauth, JavaScript, Bootstrap, and custom CSS as well.

EXPERIENCE

Signpost
February 2015 - February 2016

Senior Sales Executive
